

Quality People. Quality Products. Quality Customers.

2 PIECE BALL & SLEEVE

The 2 Piece Ball & Sleeve Plunger Lift System utilizes a proven, previously patented, two-piece plunger design. The large bypass area of the plunger, coupled with high strength materials ensures increases to production. Plunger and Ball combos are available in titanium, steel, and other specialty materials. Fluid and gas rates determine plunger length and weight requirements.

FEATURES & BENEFITS

- Removes more wellbore fluid by making more trips per day
- Provides a deliquification solution for slim-hole, tubingless and packer completions
- Broadens the application of plunger lift technology to benefit wells that are above critical rate
- Virtually eliminates the need for any shut-in time
- Works well with onsite compression
- Operates with minimal bottom hole pressure
- Eliminates line pressure spikes
- Maintains a low flowing bottom hole pressure
