
INSPECTION STAND

Application

Specifically designed platform for accessing your wellhead lubricator for plunger lift maintenance and servicing. Protect your operators by supplying a sturdy workplace in all weather conditions with 3 point contact. Protect your investment by eliminating concerns of slipping off of the wellhead or portable devices for accessing taller wellhead trees.

Features and Benefits

- Full floating design bolts directly to wellhead components that never move, unlike ground mounted models
- Adjustable mounting for all applications
- Latching entry provides easy, one handed operation to give secure enclosure when operator is on the platform
- Powder coated for lasting protection; available in yellow or black
- Ladder length can be ordered from 0-6 feet to access wellheads with extended heights and multiple master valves
- 500 lbs working capacity
